04 Selective inference at test time

one shared LS-Net | no retraining

Identity

p_0 = softmax(LS-Net(x))

confidence gate

max $p_0 < \tau$?

No

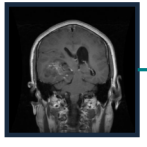

retain p_0

one forward

Yes

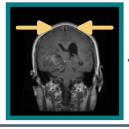

SCALE-CONSISTENCY PROBE

2 extra forwards

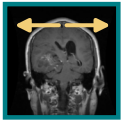

identity

one shared LS-Net

0.9× (−10%)

1.1× (+10%)

shared LS-Net

argmax p_-, p_+

both match $\hat{y}_0$?

yes

AGREE

mean of 3 views

identity + scale pair

no

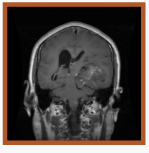

DISAGREE

acquire 3 more views

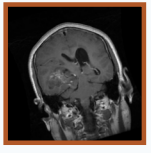

complete the 6-view set

CONDITIONAL VIEW BANK

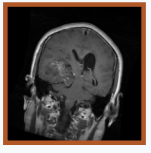

mean of 6 views, +3 forwards

↔ **flip**

↺ **+15°**
